SKILLS

- Leadership and team management
- Strong organizational and coordination skills
- Effective communication skills

EXPERIENCE & LEADERSHIP

- **Technical Content Coordinator**
- **Event Organizer & Student Lead High School Outreach Program**

LANGUAGES

- English
- Marathi
- Hindi

PROFESSIONAL SUMMARY

Detail-oriented Computer Science and Engineering undergraduate with a strong academic trajectory, maintaining a cumulative CGPA of 8.06. Proficient in building responsive front-end layouts using HTML, CSS, and JavaScript, paired with modular backend development in Python, C++, C, and Java. Actively expanding technical expertise through specialized training in AI-driven ethical hacking, automated threat intelligence, and vulnerability assessment. Seeking an opportunity to leverage software engineering, academic excellence, and offensive security concepts in a professional development or analyst role.

EDUCATION

Yashwantrao Bhonsale Institute of Technology — Sawantwadi, MH
Bachelor of Engineering (B.E.) in Computer Science and Engineering (NEP 2020) — **2024– Present**

Kudal Highschool Jr. College — Kudal, MH
Higher Secondary Certificate (HSC)– Science Stream — **Completion: 2024**

N.A.S.D. Vidyalaya — Walawal, MH
Secondary School Certificate (SSC) — **Completion: 2022**

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Ethical Hacking with AI Integration *(Currently Undergoing)*

TECHNICAL SKILLS

Web Development: HTML5, CSS3, JavaScript
Programming Languages: Python, C++, C, Java (Basics)
Cybersecurity & AI: Currently learning AI-Driven Threat Detection, Vulnerability Scanning Automation, Prompt Injection Defense, Ethical Hacking Methodologies
Developer Tools & Specs: Git, GitHub, VS Code, Virtual Machines (VMware/VirtualBox), Vercel

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Machine Learning & UAS Scope:** Completed an intensive 5-day, 40-hour physical boot camp covering Unmanned Aircraft Systems (UAS) and hands-on foundational Machine Learning applications for aerial data.
- **Quantexera National Tech Fest Website:** Co-developed a responsive, multi-page platform deployment for a national technical festival using HTML5, CSS3, and JavaScript for dynamic event registration layouts.
- **Lost Link LAN-Based Communication Suite:** Co-developed a decentralized chat software operating over Local Area Networks (LAN) utilizing low-overhead data protocols for secure offline network transmission.
- **Front-End Web Utilities:** Engineered a data-driven Movie Recommendation Site using array filtering logic, and architected an interactive tool for real-time CSS gradient generation.
